Dear Matthew

People with a Learning Disability - COVID Vaccination

As our Secretary of State for Health and Social Care, please can you make sure that all people with a learning disability are put first on the list to have the Covid vaccination.

I have a learning disability and I have been told I am in the vulnerable group for catching Covid – 19.

The news tells us that 6 times as many people with a learning disability have died from Covid – 19 than anybody else. But the news has not said that people like me are on the list to get vaccinated first.

People with learning disabilities have missed out a lot over the years when it comes to health issues; please can you make sure we do not miss out this time.

Yours sincerely
