

My home, My energy I have the power!

Being Smart ... Saving Energy ... Saving Money

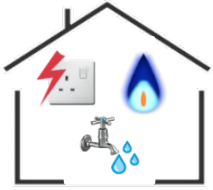

Smart Meters

Today we're going to learn about

- Being Smart
- Saving Energy
- Saving Money

My home, My energy I have the power!

Let's start by all introducing
ourselves and say **Hello**

My home, My energy I have the power!

Today we are going to look at:

- Smart Meters
- And how they can help you save you money on your Gas and Electricity Bills

My home, My energy I have the power!

Before we get to this let's do a little exercise together:

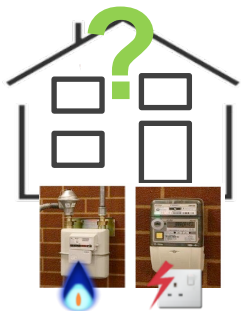

- Does anyone have a Smart Meter in their home?

- Do you want to tell us about it and how you use it?

My home, My energy I have the power!

If you don't have a Smart Meter

- Do you know where your Gas and Electricity Meters are in your home?
- Sometimes they are hidden under a kitchen cupboard
- Or sometimes outside

My home, My energy I have the power!

- They can be hard to find ...

- And hard to read and understand

My home, My energy I have the power!

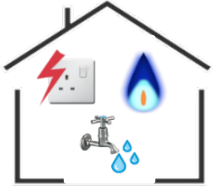

- So what is good about a Smart Meter?

- Let's watch this film together

click [How do smart meters work?](#)

My home, My energy I have the power!

- So what are the important things the film told us ...

My home, My energy I have the power!

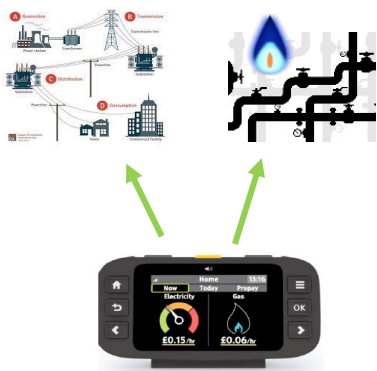

1. Your Smart Meter has an In Home Display Unit which shows how much Gas and Electricity you are using

You can put the display unit anywhere in your home that is best for you

My home, My energy I have the power!

2. Your Smart Meter sends your meter readings to your Gas and Electricity supplier

You do not have to worry about reading the meters, or sending off the information

My home, My energy I have the power!

3. Knowing how much Gas and Electricity you are using can help you save money on your bills

My home, My energy I have the power!

- So is a Smart Meter right for you and your home?

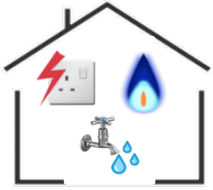

- Let's look at the presentation which teaches you about Smart Meters.
